Thelux, has one of the best R&D teams with experienced engineering and application resources. We already established a customers oriented brand-spirit at the base of tech innovation, lighting solution, comprehensive service system and spirit. Today, Thelux is offering products, designs and developing service to more than 300 customers and engineering partners all over the world.

Leading technology, customer first, integrity&pragmatic, top service, always is the intention of Thelux. Our products focus on technical content, quality and users. We are providing a full range of services from designing, production and after-sales. Thelux is willing to sincerely cooperate with all the customers in the world. Let's make the night more bright and dress up our global village!

Brand Value

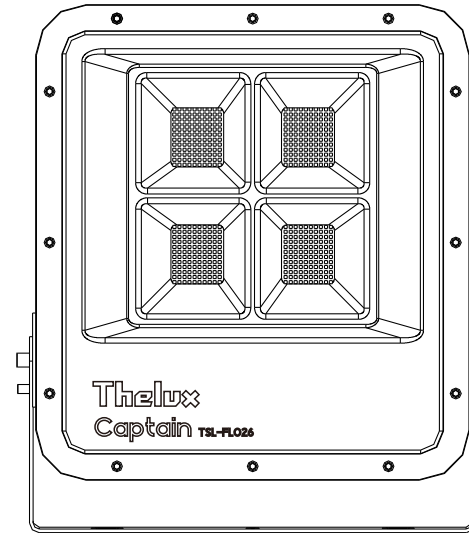

Word of “THELUX” took from “lux”, a unit of illumination to describe the Luminosity forward to a subject. It’s a physical quantity that reflects the light intensity. Its physical meaning is the luminous flux irradiated on the unit area. The unit of illuminance is the number of lumens (LM) per square meter, and its unit is lux or LX.

Head Engineering Manager of Thelux

Mr. Ammar Salman Alwaid

How we produce?

Incoming quality inspection

Weight measuring

Power testing

100W real power

Inspection 1 by 1 before production

Fixing LED drivers

Production

Thermal grease coating

Cleaning

Lamp body polishing

LED installation

Reflector installation

Lens installation

Wire connection

Finished

Final inspection and ready for shipment

Being tested with OV & LV

Aging test
